

**I. Prompt Used**

Create a one-page professional resume using the following details:

Name: Francis Jerold M. Revadona  
Email: fjmrevadona@gmail.com  
Phone: 0912 234 0996

Education:  
Bachelor of Science in Chemistry

Skills:  
UV-Vis Spectrophotometric Analysis  
Fourier-Transform Infrared Analysis  
Atomic Absorption Spectrophotometric Analysis  
High Performance Liquid Chromatography Analysis  
Organic synthesis  
Team collaboration  
Microsoft Word, Excel, and Powerpoint

Projects/Experience:  
Analyst in soil analysis project for Service Learning Program  
Communications head of Ateneo de Davao Association of Chemistry Students  
Volunteer at Human Empowerment and Advocacy Response Team

Use a clean, modern format with clear section headings.  
Keep it concise and suitable for entry-level job applications.

In terms of design, use montserrat as the font and use the following hex codes for the color:  
#ffbb17, #0c1d4b, #ffffff

## II. LLM Outputs

### A. Gemini AI

**CONTACT**

Email  
fjmrevadona@gmail.com

Phone  
0912 234 0996

**TECHNICAL SKILLS**

UV-Vis Spectrophotometric Analysis  
Fourier-Transform Infrared (FTIR) Analysis  
Atomic Absorption Spectrophotometric Analysis  
High Performance Liquid Chromatography (HPLC)  
Organic Synthesis

**OTHER SKILLS**

Team Collaboration  
Microsoft Word  
Microsoft Excel  
Microsoft Powerpoint

**FRANCIS JEROLD  
M. REVADONA**  
B.S. CHEMISTRY GRADUATE

**EDUCATION**

**Bachelor of Science in Chemistry**  
Ateneo de Davao University

**EXPERIENCE & PROJECTS**

**Analyst | Soil Analysis Project**  
Service Learning Program  
Performed laboratory analysis on soil samples to determine chemical composition and health. Managed data collection and assisted in interpreting results for local community development.

**Communications Head**  
Ateneo de Davao Association of Chemistry Students  
Led internal and external communication strategies. Coordinated with student bodies and faculty to promote departmental events and academic initiatives.

**Volunteer**  
Human Empowerment and Advocacy Response Team  
Contributed to community-based advocacy programs, providing support for social empowerment initiatives and humanitarian response efforts.

**PROFESSIONAL SUMMARY**

Dedicated Chemistry graduate with hands-on experience in spectroscopic and chromatographic analysis. Proven ability to work effectively in collaborative environments with a strong background in student leadership and community service.

### B. Chatgpt

#### Francis Jerold M. Revadona

fjmrevadona@gmail.com  
0912 234 0996

#### Education

Bachelor of Science in Chemistry

#### Technical & Professional Skills

- UV-Vis Spectrophotometric Analysis
- Fourier-Transform Infrared Analysis
- Atomic Absorption Spectrophotometric Analysis
- High Performance Liquid Chromatography Analysis
- Organic Synthesis
- Team Collaboration
- Microsoft Word, Excel, and PowerPoint

#### Projects & Experience

##### Analyst — Soil Analysis Project

Service Learning Program

##### Communications Head

Ateneo de Davao Association of Chemistry Students

##### Volunteer

Human Empowerment and Advocacy Response Team

### III. Comparison Table

| Criteria        | Gemini AI                                                                                                                                                                                            | Chatgpt                                                                                                                                                                 |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Structure       | Gemini AI was able to include the essentials in a resume such as education, technical and professional skills, experience and projects, and professional summary, but it lacked a reference section. | Chatgpt was able to cover the important sections same as with Gemini, but it lacked the professional summary section. Similarly, it did not have any reference section. |
| Clarity         | Provided more detailed information on projects and experience.                                                                                                                                       | Although it may be brief and direct, it could strike as ambiguous.                                                                                                      |
| Formatting      | Gemini was able to apply the instructed hex codes accordingly. It is more professional looking. However, a minor issue for me was that the color choice for the 'B.S. Chemistry'                     | The application of the hex codes was quite bland. The header which contains my name was awkwardly looking perhaps due to its alignment.                                 |
| Overall quality | Although Gemini AI's output lacked a reference section, it was able to provide a more professional and aesthetically pleasing resume.                                                                | Chatgpt's resume was concise and direct, but it lacked a little bit more detail. The choice of font color was also not ideal.                                           |

### IV. Reflection

Among the two LLMs that I have utilized for this laboratory activity, Gemini AI performed better compared to chatgpt. This is due to the quality of output that Gemini AI gave me. Gemini AI encapsulated what I had in mind as necessary components of a resume such as basic contact information, academic background, skills, experiences, and about me section or professional summary. On the other hand, Chatgpt might have been concise with its version of a

resume, but for me, if I were my employer, I would not be calling me for an interview because the resume lacked a bit more information about the applicant.

In terms of design, Gemini AI remained superior to that of chatgpt because not only was it able to supply the necessary information and sections for a resume, it also utilized the font face and hex codes accordingly. Conversely, Chatgpt was plain and boring. Not only was it information lacking, but it was also lacking in terms of aesthetics. In my final resume, I only refined the output provided by Gemini AI such as addition of reference section and a bit more effective use of the font colors.

My main takeaway from this laboratory activity in terms of writing prompts is that an effective prompt requires details so that the LLMs would provide better outputs. Chatgpt was not on par with Gemini AI in this activity because both were exposed to the same prompt, and admittedly, the prompt that I curated was not detailed enough. However, it was intentional on my end because I had hoped to see which among them would provide me a better output despite the lack of a detailed direction.

## V. Final Resume

### EDUCATION

#### BS in chemistry

Ateneo de Davao University

### TECHNICAL SKILLS

- UV-Vis Spectrophotometric Analysis
- Fourier Transform Infrared (FTIR) Analysis
- Atomic Absorption Spectrophotometry (AAS)
- High Performance Liquid Chromatography (HPLC)

### OTHER SKILLS

- Innovative
- Team Collaboration
- Teachable
- MS (Word, Excel, Powerpoint)

### ABOUT ME

Detail-oriented Chemist with a strong foundation in spectroscopic and chromatographic analysis. Proven ability to handle complex soil analysis and organic synthesis projects within service-learning frameworks. I combine technical laboratory proficiency with a proactive approach to team collaboration and documentation, seeking to leverage my analytical skills in a professional laboratory environment.

### EXPERIENCE

#### Analyst | Soil Analysis Project

##### Service Learning Program

Performed laboratory analysis on soil samples to determine chemical composition and health. Managed data collection and assisted in interpreting results for local community development.

#### COMMUNICATIONS HEAD

##### Ateneo de Davao Association of Chemistry Students

Led internal and external communication strategies. Coordinated with student bodies and faculty to promote departmental events and academic initiatives.

### VOLUNTEER

#### Human Empowerment and Advocacy Response Team

Contributed to community-based advocacy programs, providing support for social empowerment initiatives and humanitarian response efforts.
